Why

Definition

Suppose $U_1, \ldots, U_m$ are subsets of V The *sum* of $U_1, \ldots, U_m$ is the set

$$\{u_1 + \cdots + u_m \mid u_1 \in U_1, \ldots, u_m \in U_m\}$$

For subspaces

The sum of two subspaces is a subspace. Moreover, it is the smallest subspace containing both subspaces.

Proposition 1. *Suppose $U_1, \ldots, U_m$ are subspaces of a vector space V. The $U_1 + \cdots + U_m$ is the smallest subspace containing $U_1, \ldots, U_m$*
