Why

[1]

Problem

Consider the sequence $(a_n)_{n\in\mathbf{N}}$ defined by

$$a_n = \frac{1}{n^2}.$$

Does $\lim_{N\to\infty} \sum_{n=1}^{N} a_n$ exist? If so, what is the limit? These questions are known as the *Basel problem*.

Solution

Proposition 1.

$$\lim_{N\to\infty} \sum_{n=1}^{N} s_n = \frac{\pi^2}{6}.$$

[1] Future editions will include. Future editions may also rename this sheet.
