

OBJECTS

Why

We want to talk about things.

Definition

We use the word *object* with its usual sense in the English language. If we can touch the object, we say that it is *tangible*. Otherwise, we say that the object is *intangible*.

Examples

We pick up a pebble for an example of a tangible object. The pebble is the object. We can hold and touch it. And because we can touch it, the pebble is tangible.

We consider the color of the pebble as an example of an intangible object. The color is an object too, even though we can not hold it or touch it. And because we can not touch it, the color is intangible.

The following sheets discuss other intangible objects and little else besides.

Objects
