

## Why

1

## Problem

Consider the sequence  $(a_n)_{n \in \mathbf{N}}$  defined by

$$a_n = \frac{1}{n^2}.$$

Does  $\lim_{N \rightarrow \infty} \sum_{n=1}^N a_n$  exist? If so, what is the limit? These questions are known as the *Basel problem*.

## Solution

**Proposition 1.**

$$\lim_{N \rightarrow \infty} \sum_{n=1}^N s_n = \frac{\pi^2}{6}.$$
