

## Why

What are addition and multiplication for integers? What are the identity elements?

## Definition

We call the operation of forming integer sums *integer addition*. We call the operation of forming integer products *integer multiplication*.

## Results

It is easy to see the following.<sup>1</sup>

**Proposition 1.** *The additive identity for  $\mathbf{Z}$  is  $[(0, 0)]$ .*

**Proposition 2.** *The multiplicative identity for  $\mathbf{Z}$  is  $[(0, 0)]$ .*

## Notation

We denote the additive identity of  $\mathbf{Z}$  by  $0_{\mathbf{Z}}$  and the multiplicative identity by  $1_{\mathbf{Z}}$ . We denote the set  $\{z \in \mathbf{Z} \mid z \geq 0_{\mathbf{Z}}\}$  by  $\mathbf{Z}_+$ .
