

# Absolute Value

## 1 Why

We want a notion of distance between elements of the real line.

## 2 Definition

We define a function mapping a real number to its length from zero.

### 2.1 Notation

Let  $R$  denote the set of real numbers. We denote the absolute value of a real number  $a \in R$  by  $|a|$ . Thus  $|\cdot| : R \rightarrow R$  can be viewed as a real-valued function on the real numbers which is nonnegative.
