

SET UNIONS AND INTERSECTIONS

Why

We study how intersection and union interact.

Results

The following are easy results.¹ They are known as the *distributive laws*.

Proposition 1. $A \cap (B \cup C) = (A \cap B) \cup (A \cap C)$

Proposition 2. $A \cup (B \cap C) = (A \cup B) \cap (A \cup C)$

¹The accounts will appear in future editions.
