

STANDARDIZED ACCOUNTS

Why

We want to do our best to have only one way to write accounts.

Discussion

Consider the account.

Account 1. First Example

1		name	a	
2		name	b	
3		have	$a = b$	
4		name	c	
5		have	$c = b$	
6		thus	$a = c$	by 3,5

We standardize it:

Account 2. Standardized First Example

1-3		name	a, b, c	
4		have	$a = b$	
5		have	$c = b$	
6		thus	$a = c$	by 4,5,IdentityAxioms:1
