Definition

The *expectation* of a real-valued random variable defined on a probability space is its integral with respect to the probability measure. The expectation of a random variable is also called its *mean*.

Notation

Let (X, \mathcal{A}, μ) be a probability space and f be a random variable. We denote the expectation of f by $\mathbf{E} f$. We defined it by

$$\mathbf{E} f = \int f d\mu.$$
