

DATA MATRIX

Definition

The $data\ matrix$ corresponding to a data set of n records which are length d tuples of real numbers is the n by d matrix whose ith row is the i element of the data set. Some authors refer to the data matrix as the $design\ matrix$.

Notation

Let (a^1, \ldots, a^n) where $a^i \in \mathbf{R}^n$ for $i = 1, \ldots, n$. Let A be the $n \times d$ matrix whose rows are the a^i . Then A is the data matrix of (a^1, \ldots, a^n) . In other words,

$$A = \begin{bmatrix} (a^1)^\top \\ \cdots \\ (a^n)^\top \end{bmatrix}.$$
