

## METRIC LIMITS

## Why

Once we have a notion of distance, we can define a more general notion of convergence.

## Definition

Let (X, d) be a metric space and let  $(x_n)_{n \in \mathbb{N}}$  be a sequence in X. A *limit*  $(x_n)_{n \in \mathbb{N}}$  is an element  $x \in X$  for which  $d(x, x_n) \to 0$ .
