

## Absolute Value

## 1 Why

We want a notion of distance between elements of the real line.

## 2 Definition

We define a function mapping a real number to its length from zero.

## 2.1 Notation

We denote the absolute value of a real number  $a \in \mathbb{R}$  by |a|. Thus  $|\cdot|$ :  $\mathbb{R} \to \mathbb{R}$  can be viewed as a real-valued function on the real numbers which is nonnegative.
