

## MATRIX DETERMINANTS

Why

Definition

## Notation

TODO: notation uses permutations and  $d \times d$ .

Let  $A \in \mathbb{R}^{d \times d}$ . The determinant of A is

$$\sum_{\sigma \in S_n} \left( \operatorname{sgn}(\sigma) \prod_{i=1}^n a_{i,\sigma_i} \right)$$

We denote the determinant of A by  $\det A$ .
