**Proposition 1.** Let  $a \in \mathbb{R}$  and  $f : \mathbb{R} \to \mathbb{R}$  defined by  $f(x) = a^x$ . Then f is differentiable and its derivative is the function  $f' : \mathbb{R} \to \mathbb{R}$  defined by  $f'(x) = \ln(a)a^x$ .

This proposition encompasses the special case  $f(x) = e^x$ then  $f'(x) = e^x$ .
