

## REAL ARITHMETIC

# Why

What are addition and multiplication for reals? What are the identity elements?

## Definition

We call the operation of forming real sums real addition. We call the operation of forming real products real multiplication.

## Results

It is easy to see the following.<sup>1</sup>

## Distributive

**Proposition 1.** For reals  $x, y, z \in \mathbf{Z}$ ,  $x \cdot (y + z) = x \cdot y + x \cdot z$ .

<sup>&</sup>lt;sup>1</sup>Nonetheless, the full accounts will appear in future editions.
