

EXPECTATION

Definition

The expectation (or expected value) of a real-valued random variable defined on a probability space is its integral with respect to the probability measure. The expectation of a random variable is also called its mean.

Notation

Let (X, \mathcal{A}, μ) be a probability space and $f: X \to \mathbb{R}$ be a random variable. We denote the expectation of f by $\mathsf{E} f$, defined:

$$\mathbf{E}f = \int f d\mu.$$
