

## FIRST DEGREE EQUATIONS

## Why

1

## **Definition**

Let f(x) be a first-order polynomial. In other words, there exists  $\alpha$ ,  $\beta in\mathbf{R}$  so that  $f(x) = \alpha x + \beta$ . Then f(x) = 0 is a a first degree equation.

 $<sup>^1\</sup>mathrm{Future}$  editions will include, and will likely continue to higher degree equations.
