

Why

1

Problem

Consider the sequence $(a_n)_{n \in \mathbb{N}}$ defined by

$$a_n = \frac{1}{n^2}.$$

Does $\lim_{N\to\infty}\sum_{n=1}^N a_n$ exist? If so, what is the limit? These questions are known as the *Basel problem*.

Solution

Proposition 1.

$$\lim_{N \to \infty} \sum_{n=1}^{N} s_n = \frac{\pi^2}{6}.$$
