

## METRIC SPACE FUNCTIONS

## Why

We want to talk about functions from one set with a metric into another set with a metric.

## **Definition**

A function from a first metric space to a second metric space is a function from the first set to the second set.

## **Notation**

Let (A, d) and (B, d') We denote that f is a function from the first metric space to the second metric space by  $f: (A, d) \to (B, d')$ .
