

## NORM METRICS

## Why

If we have a norm, then we have a metric.

## Motivating Result

Let R be the set of real numbers.

Proposition 1. Let (V,F) be a vector space. Let  $f:V\to R$  be a norm. Let  $g:V\times V\to R$  such that

$$g(x,y) = |x - y|.$$

Then g is a metric.

Proof.
