

## **CONVEX HULLS**

# Why

### Definition

The *convex hull* of a subset of *n*-dimensional space is the intersection of all convex sets containing the set.

#### Notation

We denote the convex hull of  $S \subset \mathbb{R}^n$  by **conv** S.

## Characterization

PROPOSITION 1. Let  $S \subset \mathbb{R}^n$ . conv S is the set of all convex combinations of elements of S.

PROPOSITION 2. The convex hull of  $\{b_1, \ldots, b_m\} \subset \mathbb{R}^n$  consists of all vectors

$$\lambda_1 b_1 + \lambda_2 b_2 + \cdots + \lambda_m b_m$$
.

where  $\lambda_i \geq 0$  and  $\sum_i \lambda_i = 1$ .
