

## METRIC SPACE FUNCTIONS

## Why

We want to talk about functions from one set with a metric into another set with a metric.

## Definition

A function from a first metric space to a second metric space is a function from the first set to the second set.

## Notation

Suppose (A,d) and (B,d') be metric spaces. We denote that f is a function from the first metric space to the second metric space by 0  $f:(A,d)\to(B,d')$ .
