

## NORM METRICS

## Why

If we have a norm, then we have a metric.

## Motivating Result

Let R be the set of real numbers.

**Prop. 1.** Let (V, F) be a vector space. Let  $f: V \to R$  be a norm. Let  $g: V \times V \to R$  such that

$$g(x,y) = ||x - y||.$$

Then g is a metric.<sup>1</sup>
