$$\diamondplus$$

Operators

1   Definition

(provisional)

An *operator* is a tranformation where the codomain is the domain. An operator is just a transformation with a particular domain and codomain, just as a transformation is is just a function on and to vector

Operators

Vectors

Fields   N-Dimen

Groups   Real Num

Algebras   Rational Numbe

Operations   Integer Numbers

Functions

2   Relations   Zero

Ordered Pairs   Natural Numbers
